What is MyCare Ohio?

MyCare Ohio is a managed care program that will coordinate physical, behavioral, and long-term care services for individuals age 18 and older, who are eligible for both Medicaid and Medicare. This includes people with disabilities, older adults, and individuals who receive behavioral health services.

Here are some of the benefits you will receive **at no additional cost** by enrolling with a **MyCare Ohio** plan:

- You will have access to a **Nurse Advice line** available **24 hours a day, 7 days a week**, which will offer immediate assistance with your health care questions and concerns.
- You will have a **care team**, which will include you, your family, your doctor(s), your MyCare Ohio health plan and anyone else you choose to help you make decisions about your health care.

In addition, if you choose to have a MyCare Ohio plan provide **both** your Medicaid **and** Medicare benefits:

- You will have a MyCare Ohio plan to serve as your **single point of contact** for all of your Medicare and Medicaid services.
- You will have a **single ID card** for all of your Medicare and Medicaid Services.

What should I consider before I choose a MyCare Ohio plan?

Because your health care is so important, choosing the plan that best fits your needs is also important. Here are some questions to ask before making your choice:

- Which plan works with all or most of your doctors?
- Which plan works with the hospitals you want to use?
- Which plan offers the extra services you need (such as additional transportation, vision, or dental services, etc.)?

For answers to these and any other questions you have, call the Ohio Medicaid Consumer Hotline or visit www.ohiomh.com. You may also contact the plans directly if you have questions.

What happens after I choose a MyCare Ohio plan?

After you have made a choice, the plan you have selected will mail your member ID card and a handbook.

After a transition period, you will get health care from doctors and hospitals who work with your plan. If the doctors or hospitals you use do not work with the plan you choose, you can talk with your doctor and the plan about your doctor becoming a part of your plan's network.

If the doctor or hospital does not want to work with your plan, after a transition period, you may have to change doctors or hospitals.

If you receive **both** Medicaid and Medicare services from your plan, you may change your plan each month.

If you receive **only** Medicaid benefits through your plan, you may **only** make a change within the first three months (90 days) after you enroll, during the annual open enrollment period, or at other times for just cause.

As a member of a MyCare Ohio plan, you have the option to:

- Go to certain doctors, clinics, or other health care professionals without getting a referral from your provider as explained in your member handbook.
- Ask your plan for help getting health care, finding a doctor, making an appointment, getting a referral, or arranging transportation.
- Go to doctors, clinics, or other health care professionals who do not work with the plan for emergency care.
